25 November 1960

MEMORANDUM FOR: Assistant Director, Scientific Intelligence

SUBJECT : Appreciation

1. I wish to thank you for your cooperation in making it possible for ten of my analysts to be included on the recent OSI/NED sponsored trip through several domestic nuclear energy installations. My people joined the group for the last half of the trip, from 1 to 7 October 1960.

2. I talked with my analysts upon their return, and they were unanimous in their opinion that the trip had been very informative, both from technical information gained in briefings plus the opportunity to view first hand several types of nuclear energy installations.

3. In addition please extend my appreciation to Dr. Webber, [redacted] for their part in the trip arrangements. I heard many comments on the excellent planning, organization and conduct of arrangements.
